

## CHAMPIONSHIP CRICKET: GROUND RECORDS

Over the 123 seasons of 'official' operation, from 1890 to 2023, County Championship matches have been played at 175 venues. Six of these grounds have staged more than 1,000 matches, and a further 34 have staged more than 100. Twenty-one grounds have hosted only one match. Four grounds have staged home matches for more than one county.

To complicate matters further, ten counties have played home matches outside their traditional, 'cricketing' boundaries, at nineteen locations. (These grounds are indicated below by a dagger.)

The listing below sets out, county club by county club, records (as at the end of the 2023 season) for each of the grounds that clubs have used for home matches in the competition. These records comprise the highest and lowest innings totals achieved by teams, and the highest scores and best bowling returns achieved in an innings by individuals. In addition, footnotes to some entries draw attention to performances which are important records in the Championship or in all first-class cricket. In the case of grounds used for only one match, 'potted' scores are reported, drawing attention in bold to the best or 'worst' performances in that match.

The figures given owe a great deal to the recently completed series of County Grounds booklets published by the Association, to the records material available on CricketArchive and on the Association's own website, and to a variety of other publications, including Stephen Chalke's excellent 'Summer's Crown' of 2015. (There's even a certain amount of personal research, of course.)

As ever, the compiler hopes the material informs and entertains. He would welcome additions to the data, and information leading to corrections, at davidjeater@yahoo.co.uk.
